---

Hello Claudia,

It was good connecting with you Monday. Attached please find what we currently have regarding cancelled DOE grants that affect CA. In the email from Adam below, he details the provenance and significance of each document. Happy to chat again if you think it would be useful.

I've also cc'd Adam Rosenberg, who is our Energy Subcommittee Staff Director, as well as our GC Andrew Rubin. If you have any specific follow up questions about the DOE grant issues, they should be able to answer them. If you have questions about NSF, EPA, NASA, or NOAA bits, also happy to loop in other staff as appropriate. We don't directly oversee NIH activities, but also happy to try and be helpful there if we can.

Thanks,  
-John

**Subject:** DOE Project Terminations

John,

Here is a summary and attached files regarding recent DOE project terminations:

On October 2<sup>nd</sup>, DOE announced the termination of \$8 billion in awards for a wide range of clean energy projects carried out by its Office of Clean Energy Demonstrations (OCED), Energy Efficiency and Renewable Energy (EERE), Grid Deployment Office (GDO), Manufacturing and Energy Supply Chains (MESC), Fossil Energy (FE), and the Advanced Research Projects Agency – Energy (ARPA-E). DOE actually announced the cancellation of 6 of these projects supported by OCED, totaling \$900 million, on May 29<sup>th</sup>, so the real total in new cancellations is \$7.1 billion. The list of cancelled projects that DOE provided to us is the attached Excel file, titled *DOE Project Terminations - announced by DOE - 10.2.25*.

I'm also passing on a press release (copied below) and very helpful fact sheet (attached) that the Democratic staff of the House Appropriations Committee put together on this, but wanted to provide some additional context. They used USASpending.gov to determine the Congressional Districts for each of these awards. It's a good system overall but has some errors – for example the award to Leland Stanford Junior University attributed to CA-18 is actually only in CA-15. So you may want to just make sure that the listed projects are in the correct district before citing any of the specific projects listed in that document.

Also note that the items in the fact sheet should not be added up. For example, \$1.2 billion for California's ARCHES hydrogen hub is attributed to 31 different districts, but it is a single award.

Of the 321 awards terminated per the DOE spreadsheet, 1 is in North Dakota, 1 is in Florida, 1 is in Iowa, 1 is in Tennessee, 1 is in Arizona, and 1 is in South Carolina (though that one says it's to the University of Delaware, so may be mislabeled). All of those are within the Office of Energy Efficiency and Renewable Energy (EERE). The rest of the terminated awards happen to be to institutions in states that never had a majority of its voters select Donald J. Trump for President. That said, as noted in the fact sheet, DOE and

OMB were also sloppy in executing this shortsighted, ultrapartisan effort, as they apparently did not bother to note that there are many districts represented by Republicans in these states, and many of these projects are actually being carried out in districts represented by Republicans, regardless of the location of the award recipients' headquarters.

Further, I am attaching a leaked "full list" of projects that DOE has reportedly selected to cancel, totaling more than \$23B. PDF file titled *DOE Project Terminations - Leaked Full list - 10.7.25*. It includes the \$8B of terminated projects that DOE previously announced. We received this via the Executive Director of the Sustainable Energy and Environment Coalition (SEEC) of the U.S. House of Representatives, who is a very trusted source. He received it from a trusted source at a federal lobbying firm, who received it from a trusted source within DOE. This full list includes a large number of projects located in states that provided their electoral votes to Trump in 2024. According to the lobbying firm source, prior to the announced cuts, DOE provided this full list to OMB. OMB used these recommendations to focus on cuts to "blue" states. This is consistent with OMB Director Russell Vought's 10/1/25 message on X:

<https://x.com/russvought/status/1973450301236715838> - "Nearly \$8 billion in Green New Scam funding to fuel the Left's climate agenda is being cancelled. More info to come from @ENERGY. The projects are in the following states: CA, CO, CT, DE, HI, IL, MD, MA, MN, NH, NJ, NM, NY, OR, VT, WA"

Lastly, you may want to review the attached letter sent on September 9<sup>th</sup> from RMs Heinrich, Lofgren, and Pallone to Secretary Wright on DOE's previous terminations of awards stewarded by OCED, as the Department has used the same overtly political "process" for this latest round. As detailed in the letter, this is in stark contrast to the extremely rigorous merit-review process that DOE had used to select these awards in the first place, with no political appointees involved whatsoever.

Hope this is helpful. Just let me know if you'd like any more information or to discuss this further.

Adam

Adam L. Rosenberg, Ph.D.

# President Trump and Director Vought Terminate Blue State Energy Projects, Raising Prices for Consumers, Eliminating Jobs

## **\*\*NEW FACT SHEET\*\*** LIST OF PROJECTS CANCELED BY CONGRESSIONAL DISTRICT

WASHINGTON — Today, House Appropriations Committee Ranking Member Rosa DeLauro (D-CT-03) and Energy and Water Appropriations Subcommittee Ranking Member Marcy Kaptur (D-OH-09) released a breakdown by Congressional District of the energy projects terminated by President Trump and Office of Management and Budget (OMB) Director Russ Vought.

The canceled projects total \$8 billion in lawfully approved funding targeting 16 Democratic-led states, and impacting 136 Congressional Districts, 108 of which are represented by Democrats and 28 by Republicans.

Vought canceled these projects despite the fact that DOE currently remains open and fully operational using unexpired financial resources.

**“This is a shameless and vindictive attack by Director Vought, which will eliminate jobs and raise energy costs for Americans across the country,”** said House Appropriations Committee Ranking Member Rosa DeLauro. **“This was obviously designed as a political attack by the White House targeting Democrats. But the sad reality is that Americans—the middle class, working class, and vulnerable—who voted for both Democrats and Republicans will be hurt by this. This is divisive, it is petty, and unfortunately it is exactly what we have come to expect from President Trump and Russ Vought.”**

**“This week’s termination of energy projects is reckless and short-sighted — it will raise energy prices for working families, kill good-paying American jobs, and cede global clean-energy leadership to Communist China,”** said House Appropriations Subcommittee on Energy and Water Development Ranking Member Congresswoman Marcy Kaptur. **“This is political theater, not sound policy. Congress must defend communities and investments in our future — not cave to partisan threats. If we abandon an all of the above energy strategy, the American people will suffer.”**

The list of the terminated projects can be found [here](#).

# REPUBLICAN SHUTDOWN: TRUMP AND VOUGHT RAISE ENERGY PRICES

## FACT SHEET: ENERGY PROJECTS TERMINATED UNDER THE GUISE OF THE REPUBLICAN SHUTDOWN

On October 1, 2025, OMB Director Russ Vought announced that the Department of Energy would terminate \$8 billion of energy projects, targeting 16 Democratic states. Later that night, the Department of Energy (DOE) announced the termination of 321 awards. The termination of these critical energy projects will increase energy prices, eliminate jobs, and make the energy grid less reliable. Vought canceled these projects despite the fact that DOE currently remains open and fully operational using unexpired financial resources.

The terminated projects were previously appropriated and competitively selected. **These awards are relevant to 136 Members of Congress, including 108 Democrats and 28 Republicans.**

### Congressional Districts Impacted by Award Terminations

Member	Recipient Name	Award Amount
Adams, Alma S. (D-NC12)	ELECTRIC POWER RESEARCH INSTITUTE INC	\$2,200,000
Aguilar, Pete (D-CA33)	ARCHES H2 LLC	\$1,200,000,000
Amo, Gabe (D-RI01)	ACS INDUSTRIES INC	\$9,945,961
Amo, Gabe (D-RI01)	STATE OF RHODE ISLAND OFFICE OF ENERGY RESOURCES	\$1,600,000

# Congress of the United States

Washington, DC 20515

September 9, 2025

The Honorable Chris Wright  
Secretary  
U.S. Department of Energy  
1000 Independence Ave., SW  
Washington, D.C. 20585

Dear Secretary Wright:

We write to express serious concerns with the cancellation of 24 projects that were supported through statutorily mandated programs overseen by the Department of Energy's (DOE) Office of Clean Energy Demonstrations (OCED), as well as the process by which these cancellations were carried out. We are concerned that the cancellation process undertaken by DOE was haphazard, disorganized, and politically driven, and we are disturbed that the Department intends to continue to use this same fatally flawed and politicized process to terminate more awards in the near future. Troublingly, the Department cancelled projects that would re-shore domestic manufacturing, increase domestic critical material production, and spur industrial innovations. We demand that you cease the cancellation process and restore respect for independent, merit-based reviews.

On May 15, DOE announced that it was "reviewing" 179 projects that it claimed totaled \$15 billion worth of investments.<sup>1</sup> Later that month, on May 30 and with cursory explanation, the Department announced the termination of 24 projects totaling \$3.7 billion.<sup>2</sup> DOE's decision to terminate these projects runs afoul of the law.

These programs are not optional. In fact, 18 of the cancelled projects were associated with the Industrial Decarbonization Program authorized by the Infrastructure Investment Jobs Act (IIJA) in Section 41008, *Industrial Emissions Demonstration Projects*, and Section 50161, *Advanced Industrial Facilities Deployment Program*. One award was made pursuant to the IIJA Section 40342, the *Clean Energy on Former and Current Mine Lands* (CEML) program, and five awards were made pursuant to IIJA Section 41004, *Carbon Capture Demonstration and Pilots* (authorized in the Energy Act of 2020 and funded under IIJA). These programs were enshrined into law by bipartisan majorities and they represent the will of Congress. You have no legal authority to sabotage them; indeed, you possess a constitutional obligation to ensure that they are "faithfully executed."<sup>3</sup>

In order to better understand DOE's justification for terminating these projects, committee staff from the Senate Committee on Energy and Natural Resources, House Committee on Science, Space, and Technology, and the House Committee on Energy and Commerce received a video briefing from the Department on June 17. The information provided by the Department to our staff was deeply concerning. On this call, DOE detailed the

---

<sup>1</sup> "Secretary Wright Announces New Policy for Increasing Accountability, Identifying Wasteful Spending of Taxpayer Dollars," U.S. Department of Energy, May 15, 2025. <https://www.energy.gov/articles/secretary-wright-announces-new-policy-increasing-accountability-identifying-wasteful>.

<sup>2</sup> "Secretary Wright Announces Termination of 24 Projects, Generating Over \$3 Billion in Taxpayer Savings," U.S. Department of Energy, May 30, 2025. <https://www.energy.gov/articles/secretary-wright-announces-termination-24-projects-generating-over-3-billion-taxpayer>.

<sup>3</sup> <https://constitution.congress.gov/constitution/article-2/>.

process – or lack thereof – by which these 24 projects were terminated. DOE acknowledged that its review process was run by political appointees from start to finish, that the review decisions considered a project’s “alignment” with the administration’s political priorities, and even that the review decisions themselves were explicitly “subjective” rather than governed by an objective evaluation process. Perhaps not surprisingly as a result, committee staff have received reports from awardees that the termination notices sent by DOE were littered with factual inaccuracies.

During the briefing, DOE lawyers disclosed the following information to committee staff:

- The decisions to terminate the awards were made **entirely** by a group of eight or nine political appointees serving on an ad hoc “review committee” set up solely to evaluate project cancellations.
- The process to cancel these awards took only two weeks, from start to finish.
- The review committee considered each award and made its decisions based on nothing more than a one-page summary memo for each project, which was drafted by yet another political appointee.
- The review committee employed a set of eight vague and opaque criteria to determine which awards would be terminated, including such criteria as “market analysis,” “technology,” and “national security.”
- The review committee made its cancellation decisions based upon an explicitly “subjective” analysis of the eight criteria, without any requirement for a numerical score or evaluation to inform its final decisions. The review committee did not even establish an official number of criteria that a project would need to “pass” or “fail” before undertaking its review. Termination decisions could be made based upon any combination of criteria, and there was no independent expert review process to support these highly consequential determinations.
- The merit-based process by which these projects were awarded was disregarded.
- More cancellations are set to take place using this same process. The Department is currently evaluating projects from the Manufacturing and Energy Supply Chains Office, the Grid Deployment Office, and additional projects in OCED.

On June 18, you appeared before the Senate Energy and Natural Resources Committee and confirmed the involvement of DOE’s political appointees in the termination of these awards. This is highly unusual and counter to longstanding DOE precedent. It also stands in stark contrast to the rigorous, merit-based process that the Department followed in selecting each of the awards. Expert career officials within DOE assembled and utilized independent expert panels to carry out initial application evaluations. Final award recommendations were only made to a career Senior Executive Service employee within OCED. Political appointees within DOE were not even informed of who applied for these awards until the final selections were made, and they were only informed of these selections two days before the Department provided notification of these awards to relevant Congressional Committees.

In order to maintain the integrity of the Department’s merit-based review processes, political appointees have *not* historically participated in evaluating project applications. Such a capricious departure from independent, merit-based agency procedure warrants investigation.

During the June briefing, committee staff requested that the Department produce information to help Congress better understand the nature of these terminations. Despite multiple information requests by the committees, the Department has yet to produce any of the requested materials. We therefore request the Department provide responses to the following questions and produce the requested materials by September 23, 2025:

1. Please describe in detail the Department's contract review process prior to terminating the 24 contracts. In your response, please specify the factors considered.
2. In its May 30, 2025, termination announcement, the Department stated, "[a]fter a thorough and individualized financial review of each award, DOE found that these projects failed to advance the energy needs of the American people, were not economically viable and would not generate a positive return on investment of taxpayer dollars."<sup>4</sup> For each contract terminated, please describe in detail why the Department reached the conclusion the "project failed to advance the energy needs of the American people" and "were not economically viable and would not generate a positive return on investment of taxpayer dollars."
3. In its May 15, 2025, announcement, the Department stated, "the DOE has begun requesting additional information needed to evaluate 179 awards." Does the Department intend to cancel more awarded projects that previously went through a rigorous, merit-based approval processes? If so, does the Department still intend to use the same cancellation process run by political appointees used to cancel OCED projects on May 30?

In addition, please provide the following:

4. Department officials told the committees that DOE created "one pagers" or "one-page summary memos" for each OCED project considered for cancellation. Please provide copies of these "one pagers" or "one-page summary memos."
5. Please provide the assessments completed for each terminated project to determine that they did not sufficiently meet the "eight criteria" referenced in the June briefing.
6. Please provide the charter for the OCED project review committee, including the date established and a comprehensive list of participants.

We look forward to your prompt response.

Sincerely,

Martin Heinrich  
United States Senator  
Ranking Member, Committee on  
Energy and Natural Resources

Zoe Lofgren  
Ranking Member  
Committee on Science,  
Space, and Technology

Frank Pallone, Jr.  
Ranking Member  
Committee on Energy and  
Commerce
